

COMMUNITY SERVICE

Central Blood Bank

For more than 18 years, Dickie, McCamey & Chilcote has partnered with Central Blood Bank to hold several on-site blood drives every year. Since an individual is eligible to make a regular blood donation every 56 days, the firm holds 3–4 drives each year to enable people to donate as often as they are able. Each regular blood donation helps to save three lives. Each pint of blood is divided into 3 units, so one donation can help 3 different people. The blood supply is usually distributed to patients in local hospitals but, in an emergency situation, Central Blood Bank will transport units to other agencies in the country. Many members of the firm participate in the drives which are also open to other PPG tenants, spouses, family, and friends of DMC employees.

In April 2003, Tom was diagnosed with Aplastic Anemia, a blood disorder affecting adults and children. Tom received many blood transfusions and also had a bone marrow transplant in March 2004. Because blood was there for Tom when he needed it, as well as one very special bone marrow donor, Tom is enjoying his second chance at life. Donors make the difference — please donate blood.

Dickie, McCamey & Chilcote Blood Drive

Friday, September 16, 2005
8:00 a.m. to 2:00 p.m.
3rd Floor Conference Room
